+ INTERCOOLERS
BOOST YOUR PERFORMANCE

+ INTERCOOLER KITS.

Denco Diesel and Turbo are Australia's premier manufacturer and distributor of quality diesel turbocharger systems and Intercooler systems for 4WD vehicles.

The Denco Intercooler System is a barrel water-to-air system to suit various diesel applications.

Keep Your After Market Accessories

Some air-to-air systems are so cumbersome that common aftermarket extras must be removed when the air-to-air intercooler is fitted. The efficient design of the Denco Intercooler System means extras like bull bars and winches can usually be kept.

Less Volume of Air to Charge

Less plumbing is required than with air-to-air versions, which means there is less air to charge the inlet system and results in less lag. The straight flow through design minimises air pressure drop across the intercooler. An independant glycol filled system cools the charge air between the turbo and intake manifold. Internal baffles in

the liquid chamber maximise the heat exchange between the charge air and the glycol.

More Responsive at Low Speed

An independant fan gives better response at low speed, when the electric fan pulls in air to cool the glycol system. As vehicle speed increases, air speed enhances the cooling effect. Fans are removed in some situations where there is restricted space.

Independant Radiator System For Cooling Liquid

The intercooler liquid runs a separate small and highly efficient radiator and fan so it does not contribute to the heat in your existing engine cooling systems.

** For transportation reasons glycol is not included in our kit. It is readily available from auto shops.*

+ COMPONENTS.

The Denco Intercooler Kit contains everything necessary to bolt the system to your vehicle.

- Mounting Brackets
- Cast Air Plumbing
- Heater hose, fittings and clamps

The intercooler kit includes:

- Barrel Intercooler
- Radiator and Fan assy
- Water Pump
- Inline filler and cap assy

Our straight forward design allows for easy fitting. All systems come complete with fitting instructions and a detailed parts list.
