**DENCO DO IT.**

**+ TURBO CHARGERS**  
& TURBO SPARE PARTS SERVICES

## **+ OUR HISTORY.**

Denco Diesel began operations in 1970 as a diesel fuel workshop. Denco Diesel and Turbo are 100% Australian owned and operated.

Our experienced fuel injection workshop is an authorised service dealer for Bosch and Denso, Delphi, Zexel and Stanadyne.

Using the very latest test equipment, we can quickly and accurately diagnose and service

most models of fuel pumps, governors and Electronic Diesel Controlled fuel systems.

We are foundation members of the Association of Australasian Diesel Specialists (AADS).

We are distributors for Borg Warner and Garrett turbochargers and stock parts for most other makes.

## + TURBO CHARGERS.

Denco Diesel and Turbo take the hassle out of sourcing turbocharger spares. We have over thirty years experience as Schwitzer (now Borg Warner) distributors. Borg Warner produce a range of replacement turbos suitable for Holset, Mitsubishi, Garrett, Schwitzer, Cummins, Caterpillar and KKK.

Australia's largest range and stockholding of Schwitzer replacements are held at our warehouse.

We don't just carry the popular, fast moving models. Our commitment to customer service means we stock those hard to find turbos as well. From the fast moving to the uncommon or dated turbochargers, Denco Diesel and Turbo have the solution.

Our Borg Warner distributorship and Garrett agency means we have parts to suit most turbocharged vehicles in operation in Australia.

For quality repairs, we use both a Heins and Redat balancer for wheel and shaft or compressor wheel balancing.

So whether it's servicing or supplying new turbos or exchange units our experienced staff and Association of Australian Diesel Specialists accredited technicians can get you up and running faster.

## + AFTERMARKET DIESEL SYSTEMS.

A common complaint from diesel vehicle owners is lack of power. The addition of a Denco Turbo System enhances vehicle performance and efficiency.

With over 30 years experience Denco's combined turbo and fuel injection expertise has provided an excellent base for the range of aftermarket turbocharger systems produced locally in their Australian owned facility and proudly exported worldwide.

Our systems are set to a low boost pressure and an increase in power of 30-35% on a standard vehicle can be expected.

Turbo systems are available to suit a range of popular diesel 4WD vehicles.

## + INTERCOOLERS.

Delivering up to 20% extra power, the most noticeable advantage is the significant temperature drop in air being delivered to the engine.

### Accessories

Pre-cleaners, Turbo Timers, Boost Gauges, Power Upgrades, Air and Fuel Filters, Exhaust Systems, Denco Diesel Filter Adaptor.
